# SERIES 18000 PROGRAMMING CENTER

Quickly delivers hundreds of micro-software programs on demand.

---

The Series 18000 Programming Center is designed for fast, simple operation by the sales assistant. Easy to follow prompts appear on the video screen and guide the operator through the title selection and programming sequence.

All popular software titles are stored within the programming center. The customer's choice is delivered on demand, in seconds. All popular media types are offered including floppy disk, cassette and cartridge.

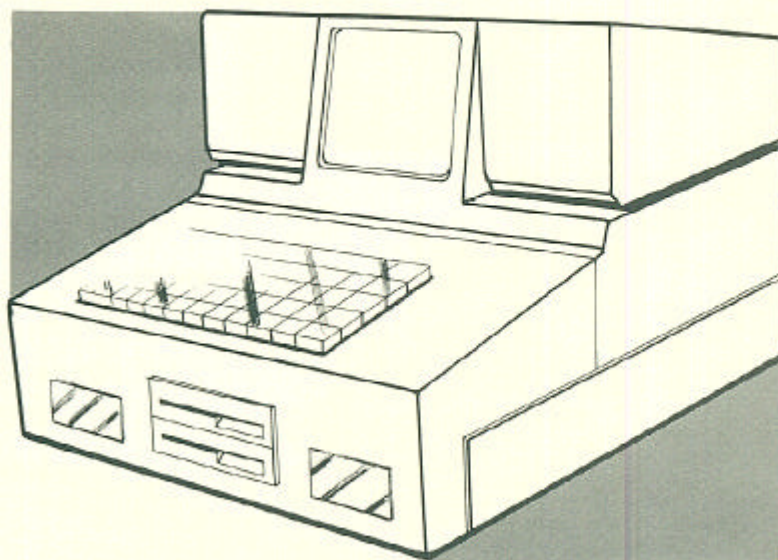

The store manager using special access codes sets retail pricing, assigns passwords for sales assistants, and extracts daily sales printouts.

Accounting accuracy is insured through a system of physical and electronic checks and balances developed in conjunction with one of the largest international accounting firms. Complete auditability is assured.

Extensive security provisions protect the programs residing within the 18000. All software is stored in an encrypted form. Numerous proprietary security devices are also provided.

All software security schemes on the original copy of a program are duplicated on the copy to prevent piracy.

Various tests assure the integrity of the software delivered. Labels for the media and a detailed physical receipt of the transaction for the retailer are provided. Custom or generic packaging and documentation may be offered.

Customer information may be entered through the keyboard to allow warranty registration so you can advise them when enhancements to their programs are available.

---

## Programming Options

---

The Series 18000 Programming Center is offered in a modular configuration. The basic chassis will accommodate many different media types. The front of the machine has three bays that will accept the following:

### CASSETTE DRIVES

The right and/or left bay can each accept a high speed cassette drive.

### FLOPPY DISK DRIVES

The center bay can accept up to two of these floppy-disk drives. A 5¼" double density disk is supplied as standard equipment. Other drives are available for 3", 3½" and 5¼" quad density disks. All popular operating systems are facilitated.

### CARTRIDGE MODULES

The right and/or left bay can each accept up to three cartridge slots. Choose between: Atari, Coleco, Commodore, IBM PC jr., Mattel and T.I. 99/4A. All popular memory devices are accommodated.

The 18000 stores up to 1000 software titles each averaging 30K in length. The programming center is the size of a cash register measuring 24" (61cm) W x 20" (51cm) D x 16" (41cm) H and weighs 68 pounds.
